

Reggie Ezell's Year Long Courses: ***26 Seeds: a Year to Grow*** and ***Primitive to Modern***

2014: There is only one slot left for one city to commit to. Between now and the beginning of 2014 there is still time enough to lay claim on the one remaining slot. See "Calendars" on the home page of my website www.reggiezell.com

2015, 2016, 2017: These are the final years that I will be teaching either of the two Year Long Courses. Each of these years will have openings for four cities. Currently there are already cities organizing for each of these years, pending committment.

If you are one of the people in your guild that makes things happen please take the initiative to get the ball rolling to make one of the Year Long Courses happen in your city. Simply let me know you are interested. If the time would be right for others in your guild to have this information to get moving with it please pass it on to them.

Quite often people will see promotion, or even better, students' works, be inspired, and vaguely muse, "Wouldn't it be nice to have that here *some day*....". The some days are running out. The clock is running down. Please get this announcement into the hands of people in your group who will take action on it.

I am happy to answer all inquiries by email or telephone. Complete information for students and course organizers alike are on my website www.reggiezell.com I will help organizers with many aspects of getting the course going: promotion, finncial planning, designating responsibilities, and perspectives. There will soon be short videos posted on YouTube at Reggie Ezell Channel to help you promote the Courses to your groups.

I hope to accommodate all potential cities between now and 2017 that wish to take the Year Long Courses.
